

Lucas Baronio

Software Engineer

Resume Summary

As a Software Engineer, I specialize in creating scalable, high-quality web applications that not only meet user needs but also make a significant impact. My goal is to continuously provide value to users through innovative and impactful web solutions.

Work Experience

Oct. 2021 -
today

Software Engineer Fullstack, PedidosYa

PedidosYa is a food delivery company (present throughout Latin America) where 100% of its profits depend exclusively on its web platforms and mobile app. Within the company I find myself performing tasks as a web and backend developer providing services on the checkout screens and payment methods. Our main objective is to improve the user's payment experience, providing them with as many ways as possible to pay for their order in a secure way. Some data that represents the impact of my work since I have been in the company:

+18%

Users who made an order with at least one card

PCI

We obtained the certificate for all our payment flows

5

New payment methods

Feb. 2021 -
Jul. 2021

React Native developer, FletesApp

As a freelancer, I had the opportunity to collaborate with a colleague on a project for a specific client, developing a mobile application that connected transporters with users in need of their services. The app was implemented using React Native on the client side and Golang on the backend.

Ago. 2015 -
Sep. 2021

Sr DBA/DevOps, KnowHow Uy

In over 6 years working at the company, I performed tasks as a DBA/DevOps for over 40 clients throughout Latin America. I improved and streamlined tasks related to installation, configuration, and monitoring of database engines such as MySQL, MariaDB PostgreSQL, MongoDB, Oracle, DB2, SQL Server y Redis.
